[A methodology for testing spreadsheets](#) 100%

 Gregg Rothermel , Margaret Burnett , Lixin Li , Christopher Dupuis , Andrei Sheretov
ACM Transactions on Software Engineering and Methodology (TOSEM) January 2001
Volume 10 Issue 1
Spreadsheet languages, which include commercial spreadsheets and various research systems, have had a substantial impact on end-user computing. Research shows, however, that spreadsheets often contain faults; thus, we would like to provide at least some of the benefits of formal testing methodologies to the creators of spreadsheets. This article presents a testing methodology that adapts data flow adequacy criteria and coverage monitoring to the task of testing spreadsheets. To accommodate ...

[Technical papers: software testing: Automated test case generation for spreadsheets](#) 100%

 Marc Fisher , Mingming Cao , Gregg Rothermel , Curtis R. Cook , Margaret M. Burnett
Proceedings of the 24th international conference on Software engineering May 2002
Spreadsheet languages, which include commercial spreadsheets and various research systems, have had a substantial impact on end-user computing. Research shows, however, that spreadsheets often contain faults. Thus, in previous work, we presented a methodology that assists spreadsheet users in testing their spreadsheet formulas. Our empirical studies have shown that this methodology can help end-users test spreadsheets more adequately and efficiently; however, the process of generating test cases ...

[A generalised spreadsheet verification methodology](#) 99%

 Nick Randolph , John Morris , Gareth Lee
Australian Computer Science Communications , Proceedings of the twenty-fifth Australasian conference on Computer science - Volume 4 January 2002
Volume 24 Issue 1
Although spreadsheets have been around for over thirty years, we are only just realising their importance. Most companies use spreadsheets in their decision-making processes, but rarely

employ any form of testing. This paper shows how an "all-uses" test adequacy technique can be integrated into Microsoft's Excel. The modular technique adopted makes the implementation spreadsheet package independent. It also includes a user interface, to assist developers specify test cases and a technique for re ...

4 What you see is what you test: a methodology for testing form-based visual programs 97%

Gregg Rothermel , Lixin Li , Christopher DuPuis , Margaret Burnett

Proceedings of the 20th international conference on Software engineering April 1998

5 Technical papers: empirical studies I: End-user software engineering with assertions in the spreadsheet paradigm 82%

Margaret Burnett , Curtis Cook , Omkar Pendse , Gregg Rothermel , Jay Summet , Chris Wallace

There has been little research on end-user program development beyond the activity of programming. Devising ways to address additional activities related to end-user program development may be critical, however, because research shows that a large proportion of the programs written by end users contain faults. Toward this end, we have been working on ways to provide formal "software engineering" methodologies to end-user programmers. This paper describes an approach we have developed for support ...

6 WYSIWYT testing in the spreadsheet paradigm: an empirical evaluation 77%

Karen J. Rothermel , Curtis R. Cook , Margaret M. Burnett , Justin Schonfeld , T. R. G. Green , Gregg Rothermel

Proceedings of the 22nd international conference on Software engineering June 2000

Is it possible to achieve some of the benefits of formal testing within the informal programming conventions of the spreadsheet paradigm? We have been working on an approach that attempts to do so via the development of a testing methodology for this paradigm. Our "What You See Is What You Test" (WYSIWYT) methodology supplements the convention by which spreadsheets provide automatic immediate visual feedback about values by providing automatic immediate visual feedback about ...
